LAUNDRY SERVICE APP

Core Features List

Based on your requirements, here are the detailed features for your **Android and iOS** mobile application, split by panel:

👤 **User Panel (Mobile App)**

1. **Login & Registration:**

   o Secure **login/sign-up** using **mobile number** and/or **email address**.

2. **Service Booking:**

   o An interface for the user to select and **book** a laundry service.

   o Selection of a **specific date** for pickup.

   o Selection of a defined **time slot** for pickup.

3. **My Orders:**

   o A dedicated section to view a **list of all their past and current orders**.

   o Basic order details (e.g., booking date, time, status like 'Booked', 'Picked Up', 'Delivered').

👑 **Admin Panel (Mobile or Web)**

1. **Bookings Overview:**

   o A dashboard or list view to **see all booking details** (user info, date, time slot, service requested).

2. **Order Management (Basic):**

   o Ability for the admin to **manually update the order status** (e.g., from 'Booked' to 'Sent for Pickup').

3. **Delivery Boy Assignment (Manual Process):**

   o A function for the Admin to **"send a delivery boy"** by manually updating the order status and perhaps adding a simple note or marking it as 'Assigned' within the system.
